## 10-Tray Dehydrator with Digital Controller

### Features

- Multiple Programs.
- Contains 10 trays with 2 drying zones.
- 99 Hour 59 Min Timer  
2 Time / 2 Temperature Settings.
- 85°F - 165°F / 29.4°C - 73.9°C
- 110V-240V, 500-540 watts
- Parallex® Horizontal AirFlow
- Hyperwave™ Technology
- Unit Size: 16"H x 12"W x 18"D

The Excalibur® Model RES10, 99 Hour 59 Min Timer Dehydrator, comes with 10 trays and 2 clear doors so you can view progress without interrupting the drying process. The Model RES10 comes complete with a total of 9.3 square feet of drying space, 131.00 CFM air flow with two independent fans, two independent adjustable thermostats 85°F – 165°F, Hyperwave™ Patented Technology, and Parallex® Horizontal Air Flow. Dehydrate using zone A, zone B or both zones A and B. Each zone can be set for 1 or 2 time durations and 1 or 2 temperature settings for variable food drying needs and to speed up the drying process. Option to program and save 30 of your favorite recipes.

The Excalibur® Dehydrator removes water from food by a continuous circulation of thermostatically-controlled warm air. A variety of foods, from bright golden kernels of farm-fresh corn to rings of island-sweetened pineapple can be dehydrated. Slices of beef, chicken, fish or even venison can be easily dried into homemade jerky. A fruit puree dries into a vividly colored, taffy-like snack or fruit roll. Make soup mixes, herb and spice mixes, yogurt, arts & crafts ... even all-natural pet treats. Operating cost for your Excalibur® Dehydrator is approximately 3 - 6 cents per hour. Using your dehydrator compared to traditional canning or freezing methods will prove to be well worth your initial low-cost investment.
